

RASHMITHA P S

.NET Full Stack Developer

Dubai, UAE | 0509028359 | pulunjanarashmitha97@gmail.com | [linkedin.com/in/rashmitha-pulunjana-810560202](https://www.linkedin.com/in/rashmitha-pulunjana-810560202) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Software Developer with 5+ years of experience delivering scalable web applications and enterprise solutions. Proficient in .NET Core, REST APIs, Angular, and SQL databases, with expertise in building secure, high-performance systems, legacy system modernization, and integrating third-party services including AI-driven automation. Passionate about creating efficient, maintainable solutions that drive business growth and improve user experience.

SKILLS

Programming: C#, TypeScript, JavaScript, HTML5, CSS

Frameworks: .NET Core, .NET 9, Angular 16, ASP.NET WebForms

Databases: Microsoft SQL Server, Oracle PL/SQL

Technologies: REST APIs, Microservices, Clean Architecture, SignalR, JWT Authentication, OAuth 2.0

AI & Automation: Ollama (Local LLM Integration), AI-driven Process Automation

Notifications & Messaging: Firebase Cloud Messaging (FCM), SignalR, MQTT

Cloud: Microsoft Azure (App Service, Blob Storage)

Tools: Visual Studio, VS Code, SSMS, Git, SVN, Postman, IIS

Other: Dapper, ADO.NET, LINQ, Legacy-to-Modern Migration, Agile Development, API Integration

PROFESSIONAL EXPERIENCE

Full Stack Software Developer — NAFFCO FZCO

Jan 2025 – Current | Dubai, UAE

- Developed an IoT-based Fire Detection System with real-time dashboards using Angular 16 and .NET 9 Web API, enabling instant alerts via SignalR.
- Designed role-based, multi-tenant access control across Stock Management, CRM, HR, and Task Management modules, securing sensitive enterprise data.
- Built scalable backend APIs to process real-time sensor data, improving system performance and reliability.
- Integrated Leaflet Maps for live geo-visualization of fire detection zones, enhancing monitoring and incident response.
- Migrated legacy ASP.NET WebForms applications to Angular 16 and .NET Core, modernizing the technology stack and improving maintainability and performance.
- Integrated Firebase Cloud Messaging (FCM) to deliver real-time push notifications for fire alerts and system events across web and mobile clients.
- Implemented AI-powered automation using Ollama (local LLM) to support intelligent process automation within enterprise modules, reducing manual effort.
- Applied clean architecture principles to improve maintainability, scalability, and system performance.

Software Engineer — Tata Consultancy Services

Dec 2022 – Sep 2024 | Bangalore, India

- Developed scalable backend services for British Telecom using ASP.NET Core Web APIs and ASP.NET Web Forms with JavaScript, AJAX, HTML, and CSS for dynamic user interfaces.
- Deployed and managed services on Azure App Service, and implemented Azure Blob Storage for secure file storage.
- Optimized PL/SQL procedures and database queries, improving data processing efficiency by 20%.
- Implemented XML processing and parsing for SOAP messages to ensure seamless data exchange between systems.
- Implemented OAuth 2.0 authentication with Azure Active Directory for secure enterprise access.
- Resolved critical production issues via root cause analysis and performance tuning.
- Collaborated in Agile teams to deliver business-aligned solutions.

Web API Developer — Lucid IT Solution Pvt Ltd

Feb 2021 – Dec 2022 | Bangalore, India

- Developed RESTful APIs for a Restaurant POS system using ASP.NET Core.
- Implemented JWT-based authentication and role-based access control for secure data access.
- Designed CRUD operations and database logic using ADO.NET and LINQ.
- Performed API testing and documentation with Postman to support frontend.

PROJECTS

IoT Fire Detection System

- Designed the real-time monitoring architecture for a building fire detection system, pushing instant sensor-based alerts via SignalR.
- Integrated Leaflet Maps for live geo-visualization of fire detection zones across multiple buildings.
- Applied Clean Architecture principles to keep the sensor-data pipeline scalable and maintainable.

HR Self-Service System

- Developed enterprise HR self-service modules to automate employee request and approval workflows across multiple business processes.
- Implemented HR clearance management with department-wise approvals, status tracking, and employee exit workflow handling.
- Designed role-based, multi-tenant access control to protect employee data across different HR processes.

Collaboration & Communication Platform

- Developed a collaboration platform featuring task management and real-time chat capabilities to improve team communication and productivity.
- Built RESTful APIs for task creation, assignment, status tracking, deadline management, chat management, message history, and file sharing using .NET Core, Dapper, and SignalR for live communication.

Inventory & Stock Management System

- Developed a centralized inventory platform for managing items, user assignments, item delegation, and stock verification processes.
- Created dashboard APIs providing inventory summaries, detailed reports, and actionable insights for stock management.

Major Service Outage System (British Telecom)

- Developed an enterprise outage management platform for monitoring and managing telecom service disruptions across impacted regions and customer locations.
- Implemented reactive outage creation from customer IVR incidents and proactive outage scheduling before planned service interruptions.
- Built UI outage lifecycle management, including creation, assignment, tracking, updates, and closure of service incidents.

Restaurant Management System

- Developed scalable REST APIs for table reservation and order punching modules using .NET Core and SQL Server.
- Implemented reservation scheduling, table allocation, order processing, billing logic, and order status workflows.
- Designed role-based authorization and validation to ensure secure access and data integrity across restaurant operations.
- Improved backend performance through optimized SQL queries and efficient API design.

EDUCATION

Master of Computer Applications — Mangalore University

Dec 2020 | Mangalore, India

VISA & AVAILABILITY

Visa Status: Sponsored residential visa

Notice Period: 30 days
